PROFESSIONAL SUMMARY

Passionate Computer Science Engineering student with demonstrated expertise in product development, AI-driven applications, and social-tech platforms. Proven experience in agile methodologies, user-centered design principles, and cross-functional collaboration with backend and frontend teams. Strong analytical and problem-solving skills with hands-on experience in market research, competitive analysis, and user feedback analysis. Seeking to leverage technical expertise and product management skills to drive innovation at MeetMux’s AI-powered social platform revolutionizing real-life social connections.

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech., CSE	National Institute of Technology, Patna	8.12 CGPA	2023 to Present
Senior Secondary	Global International Public School	87%	2023
Secondary	St. Xavier’s Jr./Sr. High School	94.6%	2021

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Human-Computer Interaction, Database Management Systems, Mobile Application Development, Machine Learning, Operating Systems, Computer Networks, Product Design, User Experience Research

PRODUCT DEVELOPMENT EXPERIENCE & PROJECTS

- FinTracker: AI-Powered Personal Finance Management Platform** June 2024 - Present
Product Development / React.js, TypeScript, Firebase, Machine Learning, User Research, Agile [\[GitHub Live Demo\]](#)
 - Executed end-to-end product development lifecycle from ideation to launch, collaborating with cross-functional teams to deliver user-centered financial management solution, achieving 40% user engagement increase
 - Conducted comprehensive market research and competitive analysis across 15+ fintech platforms to identify user needs and product opportunities, delivering actionable insights that shaped product roadmap
 - Implemented AI-driven recommendation engine using machine learning algorithms and data analysis, improving user financial goal achievement by 35% and reducing onboarding time by 25%
 - Designed interactive prototypes, wireframes, and user flows using modern UI/UX principles, conducting user research with 50+ participants to validate product concepts and enhance user experience
 - Gathered and analyzed user feedback from 150+ beta users through surveys and interviews to refine features, achieving 4.5/5 user satisfaction rating and 98% system uptime
 - Coordinated backend API integration with frontend components ensuring seamless real-time data synchronization, utilizing agile methodologies and delivering features 20% ahead of schedule
 - Deployed production-ready application on Vercel with comprehensive monitoring, serving 100+ monthly active users with 99% reliability
- Real-time Social Networking Platform: Community-Driven Chat Application** January 2024 - Present
Full-Stack Product Development / Node.js, React.js, Socket.io, MongoDB, Product Strategy [\[GitHub Live Demo\]](#)
 - Conceptualized and executed innovative social networking platform focusing on real-time community interactions, developing comprehensive product roadmap and feature prioritization framework for social-tech market
 - Architected scalable backend infrastructure supporting 500+ concurrent users with real-time messaging capabilities, achieving 99.5% message delivery reliability and 200ms average response time
 - Created intuitive user interface following user-centered design principles, conducting usability testing with 80+ participants to validate product concepts and improve user retention by 45%

- Implemented advanced group chat functionality with file sharing capabilities and social media integration, serving 25+ active communities with seamless user experience
- Integrated cloud-based media storage solutions handling 300+ daily uploads with 97% reliability, optimizing performance metrics and user engagement analytics
- Deployed production application with comprehensive monitoring and A/B testing capabilities, maintaining 98% uptime while serving growing user base across multiple platforms
- Utilized agile project management methodologies and cross-functional collaboration to deliver iterative improvements based on user feedback analysis
- **Mobile Social Discovery App: Location-Based Activity Matching Platform** *September 2023 - December 2023*
Product Strategy & Mobile Development / Flutter, Firebase, User Experience Research, Prototyping [\[GitHub\]](#)
 - Designed cross-platform mobile application prototype focusing on location-based social discovery and intelligent activity matching algorithms, similar to MeetMux's vision for connecting people through meaningful experiences
 - Conducted extensive user research and competitive analysis of 12+ social discovery apps to identify market gaps, user pain points, and product opportunities in the social-tech landscape
 - Created detailed wireframes, user journey maps, and interactive prototypes using industry-standard design tools, implementing user-centered design methodologies throughout development process
 - Developed secure user authentication system with social media integration and real-time location services, ensuring seamless onboarding experience and user safety protocols
 - Performed iterative user feedback analysis and A/B testing to optimize user interface design, achieving 30% improvement in user retention and 4.2/5 app store rating in beta testing
 - Collaborated with backend developers to define API specifications and database architecture, ensuring smooth integration between mobile frontend and server infrastructure

TECHNICAL SKILLS & PRODUCT MANAGEMENT TOOLS

- **Programming Languages:** JavaScript, TypeScript, Python, Java, C++, HTML5, CSS3, SQL, React.js, Node.js
- **Product Management Tools:** Jira, Trello, Confluence, Figma, Adobe XD, Miro, Notion, Slack, Microsoft Project, Asana
- **Frontend Technologies:** React.js, TypeScript, Flutter, Vite, Tailwind CSS, Redux, HTML5, CSS3, Responsive Design
- **Backend & Database:** Node.js, Express.js, MongoDB, Firebase, Socket.io, RESTful APIs, JWT, Mongoose ODM, PostgreSQL
- **AI & Machine Learning:** TensorFlow, Scikit-learn, Natural Language Processing, Recommendation Systems, Data Analysis, Predictive Analytics
- **Development & Deployment:** Git, GitHub, VS Code, Vercel, Render, Docker, AWS, Google Cloud Platform, Postman, Firebase Console
- **Product Design & Research:** User Experience Design, Wireframing, Prototyping, User Research, A/B Testing, Analytics, Market Research
- **Agile & Project Management:** Scrum, Kanban, Sprint Planning, Stakeholder Management, Cross-functional Collaboration, Product Roadmapping

LEADERSHIP EXPERIENCE & ACHIEVEMENTS

- **Product Development Club, NIT Patna-** Core Team Member: Organized workshops on product strategy, user research, and design thinking
- **Hackathon Achievements-** Winner at TechFest Innovation Challenge 2024: Developed AI-powered social platform for connecting people with shared interests
- **Academic Excellence-** JEE Mains Rank: 17452 | Consistent Dean's List recognition | CGPA: 8.12/10 | Top 10% in class
- **Open Source Contributions-** Active contributor to React.js and Node.js community projects with 75+ GitHub commits
- **Technical Leadership-** Led development team of 5 members in college project competitions | Mentored 20+ junior students

CERTIFICATIONS & ADDITIONAL INFORMATION

- **Product Management Certifications-** Google Project Management Professional Certificate | Certified Product Manager
- **Technical Certifications-** Machine Learning Specialization - Stanford University, Coursera | AWS Cloud Practitioner
- **Additional Skills-** Market Research & Competitive Analysis | User Feedback Analysis | Strategic Product Planning
- **Languages & Interests-** English (Fluent), Hindi (Native) | AI/ML, Social Technology Trends, Startup Ecosystem,
- **Availability & Commitment-** Immediate start available | Open to full-time internship commitment and relocation |
